

My Easter Holiday

On 18th April, my mum, dad and I went top Guangxi. That night, we rested at a hotel in Chongzuo. The next morning, we woke up early to see the white-headed langurs. They were jumping between the cliff and finding food. Their hands and tails were white and the other parts were black. But their baby monkeys were golden!

In the afternoon, we went to Nonggang National Nature Reserve. At night, we had a night tour. It was very dark there so we bought some flashlights. The night was noisy and insects kept buzzing all night. A cat followed us too! We went to a pond full of frogs. An Annam tree frog jumped on to my hand! It was wet and sticky. We saw a baby snake hanging on a tree and it was so cute. There were also some geckos around us. On our way, we saw some large insects, such as moths, crickets and spiders. They were as big as my hand. When we headed back, we saw a lantern-fly. It had a long and red nose and it was very colourful. We also saw a beautiful longicorn. It was light blue with black spots. It's called *Pseudonemophas versteegi*.

The next morning, we went bird watching. We put some bugs on a rock to attract birds. At first, there were only a few birds. Later, more birds came, such a rufous-capped babblers, David's fulvetta, Japanese tits, and white-rumped shamas. When we were about to leave, a blue-and-white flycatcher came. It was dark blue and white. It was shiny!

In the afternoon, we went hiking. On the way, our guide told us to try some plants. Some of them are medicine and important when we are missing in the wild. We saw a stick insect, and I put it on my hand to play with it. It thought I was a tree and climbed on me.

The vacation was unforgettable. I saw a lot of special animals and plants that I had never seen before. I could have a close encounter with the animals. It made me overcome my fear of insects. The night tour was very special because I had it with a cat.

My Chinese New Year Holiday

After the stressful examinations, it is finally time for the Chinese New Year holiday. My mom said that we were going to have a ten-day trip to Australia. I was very excited! I packed my bags and did my homework and got ready for the trip to Australia.

After a long eight-hour flight, we have finally arrived to Australia. It was currently summer time in Australia, so we all expected the weather to be really hot. Surprisingly, the weather was warm and perfect! We were going to live in a two-storey house for the ten days. It was very large. I loved it very much. We then visited some different tourist attractions. There were tons of different astonishing locations in Australia. The one we visited was called Gold Coast. The items and food there were very expensive but the view was absolutely amazing. After that, mother's friends introduced some Australian food culture to us. We tried pavlova and vegemite. Pavlova is a marshmallow cake. It was sweet but I loved it. Vegemite, on the other hand though, smelled extremely gross and tasted very salty. We didn't like it.

Ten days later, we were about to go back home. I had a fun experience in Australia. I hope I can go there again next year!

My Trip to Guangzhou

One of the most exciting and astounding events that occurred during Primary 5 is the three-day Guangzhou exchange educational trip. Many of the students waited for the trip in glee, and so did I. Let me tell you all about it!

We explored and travelled through many different places and museums, but the one destination that I found most astonishing and absolutely marvellous was the Parc Pearl River, which was like a piano museum. The ninth group that I was in explored the whole museum from head to toe. The different stylised piano exhibitions were wonderful and fantastic, as it even had a mesmerising display of a piano covered with a newspaper's design! It was a beautiful sight to the eye.

Seeing many variations of pianos throughout the expedition was truly unforgettable. As we came near to the main performance stage, a talented woman performed a few melodies for us. The rhythm was handled with the utmost professionalism, and the song and melody left a beloved print in everybody's hearts. It was truly spectacular. Four skilled students were chosen with their excited raised hands, yearning to perform in front of such a hefty audience. I thought deep beneath, " This is one unforgettable moment, and I wouldn't want to waste it!" Yet, nervousness unfortunately overwhelmed my hopes and I decided not to perform.

The entire trip to Parc Pearl River was splendidly magnificent. It was definitely my favourite place we visited and ventured through. I truly wish to visit this museum once more in the future, maybe.

A Day in My Easter Holiday

I had my Easter holiday from 17th April to 27th April! It was a good time to rest. I have done lots of exciting and relaxing things. Here is the most exciting and un forgettable day during my Easter holiday.

On the first day of the holiday, it was my best friend Susan's birthday. She invited me, Jolie and Holly to join her birthday party at her home.

After we arrived her home, we all helped to decorate her home with beautiful decorations and give her some presents. Then, we played a Switch's game, Overcooked. It was a cooperative game. We all cooperated together and won the game and moved on to a higher level. Also, we played UNO together with different modes. It was exciting. After that, we ate a delicious dinner.

At last, we give Susan a tasty birthday cake. She felt so happy. But then, the bad news came, "It's time to go!" said mum. We said goodbye to each other and left reluctantly.

What a brilliant day! I hope I can have a wonderful birthday party next year!

My Trip to Guangzhou

I went on a trip to Guangzhou recently. Although I was not with family, I went with my classmates and teachers. It was very exciting! We went to the Cantonese Opera Museum. We saw many costumes and items that were used during Cantonese operas. We took photos there.

My favourite place was a piano company. We saw many types of pianos and learned how they work. We also observed how factories produce pianos.

I think it was a very exciting trip. I wish to come back to explore more.

5L Li Ka Suen

My best friend

My best friend is Rosanna. She has a big eye and long hair. She is a bit fat. She is very gluttonous.

She is very cuties and energetic. She always smiles.

I like to play basketball and draw with her.

Because she always smiles and she draws beautifully. I think she is smart.

If I could be a cartoon character

If I could be a cartoon character, I would go to be Doraemon because he has many gadgets from the future which I can use to help others, like the gadgets, "Anywhere Door". It can help people go to anywhere they prefer immediately.

I would use to gadgets to help scientists and explorers get to same places that human cannot access to like tiny caves.

I would use the "Shrink Ray" to shrink them and their machines to allow them to get into and observe the caves. I can help human discover more natured features in the world.
