What is your dream job?

Do you have a dream job? My dream job is to be a psychiatrist.

A psychiatrist is a person who mainly provides antipsychotic to patients.

Since psychiatry is a type of medical, a psychiatrist needs to study in a medical school.

I want to be a psychiatrist because it can help people in need. Nowadays, people are very stressed. Some students and adults lack time to relax. Therefore, lots of people have mental illness and I want to help them. Also, I can earn a lot from being a psychiatrist.

To be a psychiatrist, I need to study hard since studying in medical school need excellent grades. Also, I need to study many years to become a psychiatrist. I will study hard to tackle these problems.

I want to be a psychiatrist not only because I can earn a lot from that, but also I can help people with mental disabilities. I hope I can really become a psychiatrist in the future.

What is your dream job?

Some people dream to be an engineer, a producer, a doctor or a teacher, but my dream job is to become a vet!

I really want to be a vet because I love animals and I am an animal's lover, and I hate to see sick animals. And I wanted to help them. That's why I want to become a vet.

Some people said that this job is hard, and you need to study really hard to become a vet, but I will try my utmost to become a vet, I would study hard. I would do much practice for pets' surgery, read many books.

I would try my best to become a vet, and that is my dream job! What is your dream job?

### What is your dream job?

Everyone has a dream job. Most people would love to be a doctor, a teacher or maybe a famous singer. To me, my dream job is something related to tricks and music, which is being a professional ice-skater.

Imagine stepping onto a smooth, cold sheet of ice. Your blades make a quiet "Shhh" sound as you push off. The cold air rushes past your face and suddenly, you're gliding! That feeling of moving so smoothly, almost like flying, is what draws me to ice-skating. It looks graceful and beautiful, just like dancing on ice.

Of course, being a professional skater isn't all about fun and games. It takes a lot of hard work. Skaters practise for hours every day, learning difficult jumps, spins and steps. They fall down a lot but they always get back up, determined to get back up. That's what inspired me to ice-skate.

Maybe it would be a challenging life with early mornings, travel and constant practice. But the thought of spending my days doing something I love, makes it my perfect dream job.

What is your dream job?

My dream job is to become a scientist. Because I love discovering new things about our world. Scientist solve important problems, like finding cures for diseases or creating new technologies. I enjoy doing experiments and asking questions about how things work.

Being a scientist means you can invent helpful things for people. I will study hard in school, especially in science and Math.

When I grow up, I want to make exciting discoveries which can help make life better and easier for everyone!
