

Amazing family trip

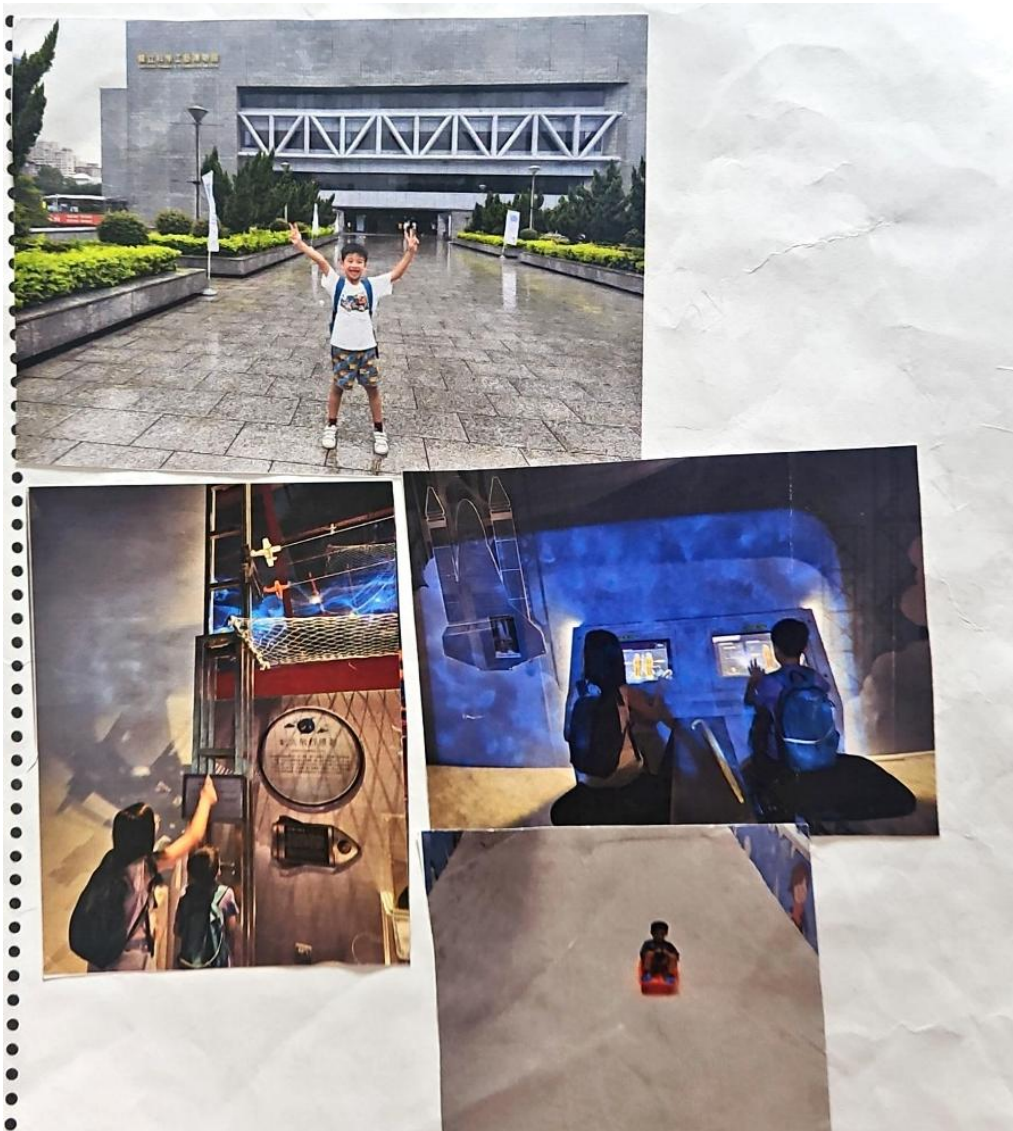

This summer, my family and I traveled to Bangkok Thailand. I visited the largest Sea Life Bangkok Ocean World in Southeast Asia. There were a lot of marine life inside that I had never seen before and I was very excited.

We took a transparent glass boat ride to the small river and see a lot of marine life such as jellyfish, sea turtle, seahorse and beautiful coral reef. We also went to the famous night market in Bangkok. It was very interesting to wear raincoats and go shopping in the night market under the heavy rain.

Kaohsiung Trip

I visited National Science and Technology Museum in Kaohsiung with my family in this summer. There were many exhibitions. I like Hot Snow Adventure Paradise most because I played sled and snow circle in Snow Slope. The magic snow was at the ambient temperature, so it did not melt. I was so excited and had great fun with my family.

Shenzhen trip

In the summer holiday, my family went to Shenzhen. We went there by bus. First, we went to Teamlab indoor playground. There were a lot of cool light and shadow games. In one of the games, I drew a shark and a staff projected it on a screen.

Then, we went to a restaurant and had dinner there. After eating dessert, we went home. I felt happy because I had a great time in Teamlab.

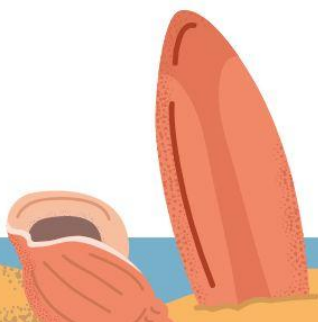

I go to Vietnam

This summer my family and I went on a trip to Vietnam.

First, we went to Ho Chi Minh City and visited the Reunification Palace.
The buildings are so beautiful.

After that, we took a boat ride over the Mekong Delta. It was amazing
to visit the floating markets. The floating markets are very cool.

I had so much fun in this trip. I hope I can go to Vietnam again for the
next holiday.

Magic-go-round Show

On 28th July, 2024, I watched the Magic-go-round Show at Kwai Tsing Theatre with my family. The performer of the show was Louis Yan. In the show, he got some food in a second. He also made the heart pendants glow. All of us got a heart pendant as a gift. I was so happy.

Ninja course

During this summer holiday, I participated in a ninja course with a group of ninjas in a gymnasium centre.

I need to use both of my hands and feet to go through different obstacles. It was so much fun. I hope our school can organize similar activities, so I can share the joy with my friends.
