

An unforgettable day

Today, I went to the Greenhill holiday park. I went there with my brother, grandpa and grandma.

We arrived there very quickly because we are going to have lunch there. I had some French fries and mixed vegetables. It tasted good. I felt very full.

I waited for a while for myself to rest and then went to the jungle park to play. Just when I was about to climb, I saw a cat, an orange cat. I didn't want to touch it because I was scared. The cat meowed at me, but I still wanted to climb. So I climbed it carefully to the other side. But I was very close to the cat, so it caught me with its claw. "Owch!" I shouted. My brother ran away and I ran with him.

Later on, I went to the hospital and took the injection and went back home. My mom told me not to touch any animals. She reminds me to take good care of myself.

An unforgettable day

A few years ago, I went to Ocean Park with my family.

First, we had so much fun on the roller coaster ride. They were really exciting.

Then, we had fun at the other rides there. The staff explained how to play the games. She said, "First, you need to take a ball. Then try to hit the bottles. IF you hit a bottle, you will get a small prize. IF you hit two bottles, you will get a medium prize. IF you nit three bottles, you will get a big prize.

Finally, I rode on the cable car. We took some pictures.

Around five, it was time to back home. I had lots of fun playing at Ocean Park. Hope I can visit there again.

An unforgettable day

Last week, my family and I went to Fukuoka, Japan. The last day of my trip was the most unforgettable.

On the last day of the trip, we did a lot of activities. First, we went to the two special hot spring, called the Arkaike. One of them was red. The other one was blue. This hot spring is one of the most famous hot spring. Then we played in the swimming pool in the hotel. It was fun.

I made a lot of memory on this trip. I hope I can go there again. Hope to visit Japan soon.

An Trip to the Central Library

Yesterday, my classmates and I went to Hong Kong Central Library. It was a bit boring at first, but as we kept walking. I felt more and more excited.

First, my classmates and I went to the sixth floor to watch some comics. There were so many comics. That was my favourite section on that floor.

At last, we went to the second floor. There were so many books. Most importantly, all of them were fiction books. My class stayed there for so long.

A Trip to the Central Library

Yesterday, I visited the Central Library with my classmates. We went there by school bus. I was so excited. My classmates were excited, too.

Then, we arrived there. We took photos with our teachers. First, the guide introduced some books to us, for example, some books in different languages, some books with different maps. Next, we had given minutes free time to borrow books. At last, we read a story. It was fun.

I felt a little bit bored because I didn't have much free time. I hope I can go there again and spend more time to stay there.

Chinese New Year 2025

The year 2025 is the year of the wood snake. The first day of Chinese New Year falls on the 29th of January.

There are many things to do during Chinese New Year. My family and I usually travel to Shenzhen where my grandparents live. It is a place near Maxland, a shopping mall with a claw machine alley full of toys, and a zoo which is full of animals. They are the attractions we will never miss.

Another highlight is the lion dance performance. My great-grandfather was good at lion dancing. After he passed away, different organizations come to perform every year. I love watching their performance very much.

Besides, we have reunion dinner and family gatherings. At the gatherings, we usually have a lot of delicious festive food and the married couples give us red packets, too.

In the Year of the Snake, I hope everything will improve by working harder and doing better.

Chinese New Year is my favourite festival because it is a joyful time for everyone.

Visiting Hong Kong Central Library

On 18th February, I visited the Hong Kong Central Library with my school. The library is located in Causeway Bay, and we got there by coach. I was excited to see what it looked like inside.

When we entered, I saw that the space was huge and that it is a multi-story library. It was impressive! Soon, we participated in different activities. First, we had a talk about the electronic resources of the public library. The librarian told us that we could use the 'My Library' App to manage our borrowing records, which was new to me. Next, we joined a guided tour to see different sections of the library. After that, we borrowed books on our own. Finally, we joined an interesting storytelling workshop.

Among these activities, my favourite part was borrowing books on our own. It was my first time using the self-checkout machine to borrow books. During this visit, I learned that librarians need to do a lot before we can borrow books. For example, they need to sort the returned books by their call numbers in a separate room before they shelve them. Visiting the library was an excellent experience, and I can't wait to go back again to borrow my beloved books.
