My Summer Holiday

What is your plan for the coming summer holidays? Today, I will share my idea with you all.

First, I will not play for the whole day, I will do some meaningful things like doing housework, homework and talk more to my family every day.

Second, I am going to travel to Japan with my family. I can discover a lot of things about Japan like their culture and their attractions. I can also learn more on Japanese culture.

Third, I will go to the Hong Kong Science Museum with my friends. It can make our relationship better and we can learn more things about science.

Last, I am going to learn a new skill, it is badminton. It can make my body healthier. This activity is funny and interesting.

All in all, we should not spend all the time to play video game, we should also prepare for primary six like doing revision every day, don't waste our precious vacation time.

My Summer Holiday

During my summer holiday, I'm planning to travel to Tokyo, it's going to be so much fun.

On the first day, my family booked a late flight, so by the time we land, we are going to go to our hotel at late night.

On the second day, we are going to visit the zoo in Tokyo. We are going to visit a lot of cute animals there, like sea otters, raccoons and red pandas, it will be an amazing day going to the zoo, I'm so ready for that day.

On the third day, we are going to go to the Tokyo Science Museum. We will learn a lot more about science there because the museum there is a lot bigger than the one in Hong Kong, so I'm so excited to learn more about science.

On the fourth day, we are going to Outlet, a place to shop, because we have to buy some rare souvenirs there. We are glad that we can still do some shopping there.

On the last day, we are going to go to the art museum for a little while and leave, because our flight is at 3 p.m., I'm very blessed that I can pay a visit to the art museum.

Overall, I'm so pumped for this trip. I hope I will have a great trip there.

My Summer Holiday

I am very excited for my summer holiday. Here are my plans.

First, on 16th July, 2026. I will go to Singapore with my choir for exchange. I am looking forward to eating traditional street food there and listen to the choir songs from other schools.

Second, I am going to go to Zhu Hai, I am going to go shopping and play in the funfair with my sister. But I think it will be very hot! I am going to explore around.

Third, I will play games with my friend, and go to the Hong Kong Ocean Park! I hope it will be fun and interesting there to see those cute sea animals!

I am super looking forward to my summer holiday!

My Summer Holiday

This year's summer holiday is packed with events! For example, I am going to go to a sleepover in my friend's home, visit Japan and Singapore, attend dance classes and even my birthday party!

I am looking forward to having my birthday party and fly to Singapore the most because in my birthday party, I am going to invite my friends and try my vanilla flavored cake!

I am also looking forward to flying to Singapore since I knew I am going to be in the camp room with my best friend Alima!

All in all, this year's summer holiday might be the most unforgettable holiday in my life!

My summer holidays

Although my summer holidays haven't come, I have already planned what to do during the summer holidays.

First of all, I am going to go to one of the Caritas Community Centres to attend some classes. I am also going to receive a formula 1 model toy car and learn to play badminton.

Next, my family and I are planning for a seven-day trip to Taiwan in early August. I think we will go up Alishan by a very slow train to reach at the hill top. We will be enjoying the beautiful scenery.

At last, at the end of our summer holidays, I am going to have a coding class, which is absolutely interesting to me. The teachers there teach us how to use the coding application *Scratch*. It is usually about how to make a car racing game and to solve some Maths questions.

I am looking forward to enjoying the time with family and learn new things.
