

My Summer Holiday

In my summer holiday, I go to Korea for six days. One day, I go to Kidzania. It is a huge park where children can work as a grown-up. I make a new friend. His name is Samuel.

First, I make ramen with Samuel. I like making ramen because I can eat after I make it. Although ramen is not a healthy food, it is tasty.

Then, I try to do the car control. It is hard to measure the dimension of the car. However, it is also fun to have the experience of doing the car control.

At last, Samuel and I learn to cook. We make food, such as rice balls, sausage and pork. What a wonderful day!

My Summer Holiday

One day, I go to the zoo with my family. We walk around the zoo and find two colourful parrots in the cage. They seem to be discussing something.

After that, we see two big kangaroos bouncing on their legs. A small baby kangaroo is in her mother's pouch. It is so cute!

Next, we find a beautiful tiger family. The baby tigers are all white in colour. "They are so special!" My brother says.

In the end, we take a rest on a bench. We have some juice and snacks together. Then we go home happily.

My Summer Holiday

During my happy summer holiday, I visit Taipei with my schoolmates and teachers in August. In TaoYuan International Airport, we take a taxi to the hotel. At six o'clock, we go to TaoYuan Ice hockey rink for practising ice hockey.

This is my first time to meet Coach Anderson and Coach Bevis. They are funny and patient. They teach me a lot of ice hockey skills.

Moreover, I meet a lot of friends there such as Jacey, Joshua and Caleb. We play together. We have so much fun.

Lastly, I enjoy Taiwan food in night market so much. For example, bubble tea and crispy Taiwan fried chicken. I wish I can join Taiwan ice hockey camp again.

My Summer Holiday

In summer holiday, my family and I go to Penang of Malaysia.

On the first day, we go to the water park. There are a lot of slides. I feel excited when I play on the longest slide in the park. We also go to the Upside-down Museum. There are many displays for us to take photos.

In the end, we go to a place called "The Top". There are distorting mirrors. We can see a beautiful view on the sixty-eighth floor. This is an unforgettable trip in Penang.

My Summer Holiday

In my summer holiday, I go to Space Museum with my dad and elder sister on 10th August.

There are many special things in the museum, such as the model of the sun, the picture of the solar system and so on. Then, my dad teaches us the life cycle of the stars.

After that, I see a picture of galaxy. It is so beautiful. Later, we try the weight of one kilogram on different planets. It is the lightest on Mercury.

In the end, we watch a video about the space. It tells us how the universe is formed. I am so excited because I learn many things about the space.
