

My Summer Holiday

I like my summer holiday. It is because I can visit many places with my family.

In the summer holiday, I went to Shen Zhen for a trip. I stayed at the Hard Rock Hotel. It is so fun because I can play many games there. I also joined a cooking class and made some cookies.

I am very happy. I hope I can go there again next year.

My Summer Holiday

I went to Clear Water Bay Beach with my family and my best friend, Joni during the summer holiday.

It was sunny day. We wore our swimsuits at the beach. My mother helped me put some sunscreen on my face and body.

We played with sandcastles and ate ice-cream. I was so happy to play with my friend.

My Visit to Ocean Park

On 23rd August, it was hot and sunny. I went to Ocean Park with my little sister and other kids. Our English teachers and staff led us. I felt very joyful!

We saw many animals. The walrus was giant. The sea lion swam quickly and was a good swimmer. The penguin was very cute. The panda was interesting. We also saw a spider, seal, frog, snake and meerkat. We watched a parrot bird show and a sea lion performance. They were fun!

We also joined a workshop and made food for a panda. I liked it very much. I feel cheerful because I learned a lot and had a happy day.

Travelling to Malaysia

During the summer holiday, I went to Malaysia with my family.

We stayed at a sea-view hotel for two days. The hotel was very big and beautiful. It was located beside the sea.

There was also a big beach. I went to the beach with my parents and elder sister. We played there and built sandcastles. It was really exciting. I felt so happy and relaxed after my trip.

Going Camping in Summer Holiday

It is a lovely day. I hear some birds singing. I was camping with my family. We stayed at Tai Mo Shan campsite. I am excited at night.

I hold a torch and walk up to hill. I can hear the sound of frogs and snakes. We need to keep quiet because fireflies like silence. Suddenly, tiny lights appear. "Look! The fireflies are dancing all around us. They flicker like stars."

It is a peaceful night. We all enjoy the nature's magic. We should protect our environment.
