

My Christmas Holiday

During my Christmas holiday, I spent most of the time with my family. It was boring and tiring at the beginning of the holiday because of the stressful examination after the holiday. But I still had some special activities with my family.

One of the most unforgettable activity was the first time my elder brother and I made a cake by ourselves in the baking workshop! I made a chocolate cake with some bananas, peaches and nuts. Finally, I put a cute chocolate bear on the cake. My mother said it was very beautiful. I was on cloud nine.

On the next day, it was my Grandmother's birthday. So I gave her my DIY cake as a present for her. We celebrated my Grandmother's birthday and Christmas together in a playroom. We had a barbecue and played board games happily.

These two days or the best part of the whole holiday for me. I am very delighted even though the holiday was over. I hope that I can go to these two places with my friends during the next holiday.

My Christmas Holiday

The Christmas holiday was a unique and exciting experience for me. Instead of staying at home to study for my final examinations as I usually do, I travel to Japan to participate in

"Tokyo Open 2025" fencing competition. This was my first time competing outside Hong Kong, so I felt a mix of excitement and nervousness as the day approached.

My dad did a good job organizing our trip. He planned different activities to let us enjoy our time in Japan. As soon as we arrived in Tokyo, we headed to Tokyo Joypolis in Odaiba, where we played many indoor amusement rides and arcade games. It was a fantastic way to relax before the competition. We also visited Yomiuri Land Amusement Park that had many enjoyable attractions. We took a lot of photos there with the big Christmas tree. We all have a great time bonding as a family.

However, there was a little mishap. My brother did not listen to our parents when they advised him to dress warmly for the cold weather. He decided to wear light clothing, which caused him to get sick. Unfortunately, he passed his illness to me and my parents. By the time of the fencing competition, I was feeling dizzy and nervous. This affected my performance and I ended up losing the match. Even though I didn't do well, my parents were very supportive and encouraging, which made me feel warm inside.

Although there was a little challenge, I still think this Christmas trip was wonderful. I got to experience new things,

and enjoyed delicious Japanese food and created lasting memories with my family. I was so delighted.

Now that I'm back, it is still the Christmas holiday and it is time to focus on my studies and prepare for my final examinations. What a full and memorable holiday!

My Christmas Holiday

My family spent most of the holiday with me. I was on cloud nine because I was going to camp. I had taken part in an exciting table tennis competition. At the same time, my family put up a small special Christmas tree in our home. Let me share more details about my holiday.

I had a camping held by BGCA organization on Lantau Island on the first and the second day of my holiday. My friends and I played hide-and-seek, card games, ball games and so on. We had hotpot for dinner. On the second day of the camp, we had to wake up at five in the morning to see the sunrise. After camping, my beautiful mother sent me home and gave me a mysterious present.

After camping, I had a table tennis competition on Christmas Day. I had the competition in Cornwall Street Table Tennis Center. My first rival was as skillful as me. We had an intense competition and were close in points. Luckily, I won this match with my patience. However, my next competitor was more powerful than me. He won easily. I gained much experience through this competition.

Although my holiday was interesting by the end of it, I still had to do revision for the examination for the rest of the days.

My Christmas Holiday

During the Christmas holiday, I went to Zhuhai and Macau with my family and friends. This trip was amazing! We played many games I need a lot of food during this trip.

On the first day, we had a glamping experience in Zhuhai. It was very special! The house was made of wood and it had a balcony. We took many photos there because the view was nice. We also watched a fire show at night. The juggler used fire to swing and danced under the fire. While watching the show, I also ate a barbecue lamb. After the dinner, we watched a funny movie, which made us laugh all night!

On the second day, we went to a big theme park. We played many games the whole morning, such as bouncing house, a maze and a sandpit. There were so many exciting activities that we could not play all the games in the theme park.

After that, we moved to another hotel in Macau. Since that day was winter solstice, we ate a big meal in a famous Chinese restaurant. We had a lot of yummy food and bought souvenirs from a shop.

When my holiday was over, I felt sad. I hope the whole day can be longer, so I can go to another country for my next Christmas holiday. Then I can also explore different cultures and experiences.

My Christmas Holiday

This Christmas holiday, I went to Okinawa with my family. We were all on cloud nine to go there.

On the first day, we went to the Okinawa Churaumi Aquarium. We saw a lot of sea animals and corals too. I learned a lot of things while looking at the fishes swimming freely.

On the second day, I went to a giant zoo with many wild animals. I also fed some fish and they were so happy. Later, I watched a show about dinosaurs in the past. It was amazing!

The best part of the holiday was to spend time with my family and we would cherish that moment forever. I felt sad when the holiday was over because I had lots of fun in Okinawa. Next year, I want to have a similar holiday because I can enjoy more time than this year's Christmas holiday.
