

My trips in summer holiday

During this summer holiday, I went to a lot of places. But I'm going to talk about the 5-day journey that I had in Korea.

First, I went and checked in the luggage that I had. Then I use the airport metro to get to the second terminal. It took some time to search for the boarding gate, but after some time, I made it to the airplane boarding gate. I hopped on the plane and it took off. It was frightening because, in the past six years, I haven't even got on an airplane. So it's just a new experience of getting on a plane. Four hours later we landed in Seoul, Korea. I got off the plane and the temperature there was not as hot as it is in Hong Kong. I'm getting used to this temperature because, in Hong Kong, the temperature is boiling. When I walked into the airport, there was not a single word of Chinese. And I know nothing about Korean, so this is terrifying for me. And made me think about how can I communicate with the Koreans. this is a challenge for me. I used my pocket money to get some lunch and went to the airport metro station.

Another thing that I found out at the airport is that the metro map there makes me dizzy. It's full of metro stations and exchange stations. And, it's full of Korean words that I don't know. Eventually, I found the right metro line to travel to the hotel. I was carrying my heavy luggage, I was walking slower than everyone else. After checking in at the hotel, I was finally able to rest.

At night, I walk down these night markets that are filled with Korean food and Korean restaurants. It was different from Hong Kong. I sat down and ate the delicious Korean food that I just bought. I ordered some chicken skewers and soba noodles. I took my first bite out of it, and my mouth was filled with water. I can't believe Korean food is so delicious. I went back to the hotel to shower and rest. this is my first day.

The second day I joined a travel tour and visited some buildings of Korea. I've not seen these spectacular buildings in my life before.

So it is also a new experience for me. The first building that I visited is called "Seoul N Tower". Which is built on a mountain. We had to take a cable car up there. But the queue was two hours long! So the travel tour decided to walk the mountain up to the tower. I was able to get into the tower and saw the spectacular view of Seoul. I'd say that a 30-minute walk up the mountain was worth it anyway.

The second tower that I am visiting, is called the "Lotte Tower" which is 555 m high. We had to take a high-speed elevator up to the top. Now, the Lotte Tower is built on the south side of Seoul. So it's a new view for me. Also, we can see small people running down the busiest streets in Korea.

Well, we were taking the high-speed elevator down, The elevator was slightly shocked, because there was a small earthquake that was happening in Korea. We were fine and we didn't get injured. I took some beautiful pictures of Korea's landscape and I called it a day. Although we didn't get any special food. At least the tour was perfect.

The next day I went to go to this theme park called "The Everland Theme Park". it was themed after the panda which is a special animal in this theme park. There's also a zoo inside. There were roller coasters, pirate boats and many other amusement rides. I went on this roller coaster which is one of the most frightening rides in the park. I said down with a terrified heart, and I stepped on the ride. I grabbed the handle, and the rollercoaster started running. I felt a bit of centrifugal force at first and I conquered it a few moments later. I screamed at the top of my lungs, and the roller coaster finally came to a stop. I thought that this was the most unforgettable experience I have had with roller coasters. And then came the sunset.

This was the last day of my journey. I went to the Lotte amusement park. There was an inside and an outside. And I went inside for us because the amusement park is as big as 5 football fields, the size of this park is horrendous. There was a hot balloon ride with you sick on the building and a tour around the whole park. It was an amazing experience to see the outside landscape and the inside landscape of the park. There was this water ride that my mom told me to try. This water ride was five minutes long but it didn't have any frightening parts. It's just an experience and floating on water. Because the music park is so big I had to spend a whole day inside of it to walk around it. Sometimes I even got lost with my mom. At night, I went to this traditional Korean restaurant, and it was packed with Korean-style things.

Happy moments can fly by so fast. And also this trip to Korea. So I had to say goodbye on the last day, and I went back to Hong Kong. It was an unforgettable experience. I hope that I can travel around the world and experience the traditions of all countries. And visit the most famous attractions around the world. This is my wish for my travel journey. Although Korea is not specified in these very big Easter events, this made my whole Easter holiday a better experience. And this is my journey around Korea.

An unexpected thing in summer

In the summer holiday, people usually go for a trip but this year, I did not. I experienced a hard time that my grandfather passed away.

In April this year, my grandfather had big a surgery with his main blood vessel in heart. The surgery went smoothly but unfortunately, my grandfather still could not rehabilitate after three months and we were all very worried about him.

One day in the morning, the hospital suddenly called us. We picked up the phone with a heavy heart. "Hello" I said. "Please come to the hospital quickly. Your Grandfather is in danger now." the doctor said. After we heard that, we drove to the hospital straightly and quickly. We prayed for the miracle to be happened again but regrettably it did not. Grandfather's breath was getting weaken gradually. At last, the red light shown in the machine was on. The doctor announced that grandfather passed away. We came out from the ward with heavy pace.

In that moment, I had a lot of wonderful memories with my grandfather in my brain and I hoped grandfather could be happy and released in the other side of the world.

My Christmas in 2025

What did you do in 2025 Christmas?

In the Christmas holiday, I went to Sichuan. In this trip, I went to a lot of places.

First, I visited a zoo which have pandas. I saw many pandas, they are cute, so I took pictures with them. Later, we went to watch red pandas. At the beginning, I can't see any red pandas, so I felt upset. But I walked up the mountain and there were a lot of red pandas.

The next day, I went to Chuanyi to see the snow mountain. The view was very beautiful. I wanted to ski but I had altitude sickness. In this trip, I also ate Sichuan traditional food such as hotpot. And knew their culture. When I came back to Hong Kong, I started to study. It is because after the Christmas holiday, I have an exam.

I hope I can go many different places in my life. Let me broaden my horizons.

My School Picnic

Last week, my school had a picnic trip to Disneyland. In the morning, we joined a STEAM class. We learned how different rides work. For example, we found out about circular motion and how it helps make the rides fun and exciting.

After the class, we had free time to explore the park. We quickly ran to the roller coaster called "One Arrow." It was very thrilling! While waiting in line, I heard many people screaming loudly. It made me feel both scared and excited!

Next, we went on the parachute ride. The centrifugal force was very strong, and the ride was very exciting and a little scary. Time passed very fast, and even though I wanted to stay longer, we had to leave.

I had a very happy day on this picnic. I hope we can go again soon!

My graduation camp

The most unforgettable camp in this 6 years is the graduation camp with my friends. I was happy with my friends in this camp.

At first, we had three days of camp so we had to prepare our clothes for daily use and of course a bunch of snacks. At that day, I and my friends ate lunch together and went to school together at 2:00. After, we went to the campsite by tour bus. We were all very excited.

Then, the guide gave the room key to our group leader. We followed the guide to go up to the rooms to put down our bags. The guide wanted us to know more about the campsite so he designed a horrible game which was very tiring. He gave each group a paper and we need to find the direct place to find the direct answer. We all searched under the blazing sun with mosquito chasing my legs turn to jelly. After the game, we had dinner, but the dinner taste awful. I thought we could go back to our room and get some rest but we still got a mission not completed. At that time, it is at night, so we had to prepare our own flashlight so freaking tired but I still need to finish the mission. The mission is we got 1 hour 45 minutes to find a blue octopus card size card and write down the words and letters. Suddenly, I and my friends were watching the map while we were walking I bumped into the fire pillar and I hurt my leg but I kept looking for the cards. Afterwards, we were sweating bullets for all the searching and I am totally dying after that. We finally can rest! We went back to freshen up and started playing and chatting with our friends. Hopefully, we survived day one.
